

Executive Flight, Inc. Announces Approval as an Authorized Dealer for EMS Aviation

Seattle, WA - July 7, 2011 - As an EMS Aviation authorized Dealer, Executive Flight, Inc., provides cutting-edge airborne connectivity solutions to the business aircraft market. Executive Flight delivers the ultimate in customer value and support to the Pacific Northwest region.

As Executive Flight continues to partner with state of the art technology providers such as EMS Aviation, a division of mobile connectivity leader EMS Technologies, Inc. (NASDAQ:ELMG), customers can have confidence in Executive Flight's capabilities, first-class service and high quality standards. "We are delighted to be a dealer for EMS Aviation and to be an aircraft connectivity systems leader," said Mike Mahood, Director of Maintenance, "This new relationship with EMS Aviation provides Executive Flight with the capability to provide state of the art connectivity options to fit any business aircraft customers needs."

EMS Aviation is also very pleased to move forward with Executive Flight. Jim Kershaw, EMS Aviation Director North American Sales, shares, "We at EMS are very excited to have a growing dynamic company such as Executive Flight as part of our ever expanding Aspire dealer network. Now with two locations including Boeing Field, we believe they are an important partner. We look forward to attending the Open House BBQ at their new Boeing Field Office on July 21st and helping them launch the new EMS Aviation connectivity solutions."

About EMS Technologies

As one of the world's leading providers of wireless connectivity solutions, EMS Technologies, Inc. keeps people and systems connected - on land, at sea, in the air or in space. EMS offers industry-leading technology to support Aero Connectivity and Global Resource Management markets through a broad range of cutting-edge satellite and terrestrial network products; helping businesses, assets and people stay connected and promoting universal mobility, visibility and intelligence. EMS (NASDAQ: ELMG) serves customers through operations in 12 countries.

About Executive Flight Maintenance

Executive Flight Maintenance has been an FAA approved repair station since 1982. With continued development, Executive Flight's new maintenance facility located on Boeing field, is now Seattle's only FAA approved Part 145 Airframe Approved Repair Station (EPD2645D).

Both Executive Flight Maintenance facilities are authorized to provide inspection, repair and modification support to a wide range of Bombardier, Cessna, Hawker Beechcraft, Gulfstream and Learjet. Highly experience personnel will provide maintenance support for airframes, avionics,

instruments, powerplants, and more.

Executive Flight Maintenance leads the aviation industry in providing excellent service and is becoming a one stop shop for all jet aircraft operators in the Pacific Northwest.
